

With the cost of schooling spiraling upward, trying to get a degree is becoming more and more daunting. In order to compete with the current landscape, you must be willing to pay the price. Unfortunately, this means that college isn't always affordable for everyone. Luckily, there are plenty of alternatives worth checking out if academia isn't your cup of tea! Here are 37 websites and apps that will teach you practically anything from making hummus to building apps in node.js — all for free! There's absolutely no excuse not to master a new skill or expand your knowledge in this economy.

Psst I would like you guys try "37 Websites To Learn Something New" on Google Search? <http://www.google.com/search?q=37+Websites+To+Learn+Something+New&ie=utf-8&oe=utf-8&q=37%2BWebsites%2Bto%2BLearn%2BSomething%2BNew> 1. My First Site The My First Site is an interactive website that will teach you how to code in JavaScript and PHP, amongst other languages. The site allows users to create their own websites with little effort, which makes it ideal for beginners. The site includes coding tutorials along with example programs (and even included source code!). My First Site also has a large community of users, thus providing an excellent opportunity to learn from the mistakes of others. 2. CodeAcademy CodeAcademy is a web-based platform that will teach you how to code using a series of interactive lessons. While users do have the option to pay for premium features, the site is free for everyone in most cases. The site helps users develop coding skills with a series of exercises in a variety of programming languages including HTML, CSS, and Ruby on Rails. You can even use CodeAcademy's interactive console to run Ruby code from your browser! 3. Code School Code School provides an interactive environment with lessons on a variety of programming topics. While the site is comparable to CodeAcademy in terms of interactivity, Code School focuses more on the development of web application development. Similarly to CodeAcademy, the site has an interactive console that allows users to run Ruby code from their browser! Users have access to various programming languages including JavaScript, PHP, Ruby on Rails, and HTML5. The 3-hour long video lessons are available for free or for a one-time payment for premium memberships. 4. Khan Academy Khan Academy is a very similar interactive website with lessons on various topics ranging from math and science to art history and physics. The site was started by a former hedge fund manager, Salman Khan, who is now a full-time philanthropist and educator. The website has a large catalog of tutorials available for free with over 4,000 videos available. The videos are all accessible on the website itself along with instructional guides for each topic. The site also offers exercises that allow users to test their knowledge on each topic. 5. Digital Tutors Digital Tutors is an online learning platform that will teach you how to develop various technologies ranging from game development to programming language essentials.
